

Otto the Robot - by YourName, member of TeamName

1. Identify the problem — What are you supposed to figure out?

The problem is getting...

2. Understand the problem

2a. What commands can Otto respond to?

STD means "stand," ...

2b. What will Otto be like at the beginning of the problem — where and in what state?

Initially, Otto will be...

2c. What will Otto be like at the end of the problem — where and in what state?

After the commands are executed, Otto will be...

2d. What kind of tools and information do you need to gather in order to solve this problem?

We need to understand...

3. Identify and list possible solutions

- 1. First leave the classroom by ...
- 2. ...
- 3. ...

4. Select the best solutions

The solution we chose was ...

5. Write down the steps to the solution (algorithm / instruction set)

The solution will be more understandable when broken into several chunks.

Leaving the classroom

- 1. STD
- 2. ...
- 3. ...
- 4. ...

6. Evaluating your solution (test)

Get a volunteer Otto and have them test drive your solution. Then write about successes, failures, and things you learned.

When we tried out our solution...
